

## **Marvel Quiz**

An Akinator-based quiz that will ask you up to 6 questions, with 6 possible outcomes.

You think of a character, and the quiz will ask you enough questions to try and describe what the character will be.

### **Approach:**

1. Display "Hello!" And begin asking questions
2. The quiz should only display up to 6 questions, it may or may not be less than 6 if needed.
  - 2.5. Make sure you are honest with your answers, or else the game will not guess anything, and the game is over.
3. The quiz will use the process of elimination.

Ex. If the player is thinking of a red character, every other character that does not meet that criteria will be removed as a possibility.
4. When enough questions have been asked, the computer will guess what the player has thought of, and the game will close.
